

Live Dispatch Software

Real Time, Custom Delivery and Work Order Tracking Solution

Live Dispatch software is an innovative solution enabling clients to fully manage orders from initial order, to fulfillment, to completed invoice. This serves as a powerful business tool providing line of sight on current and future orders resulting in saving time, money and improving efficiencies.

DESKTOP + MOBILE

We offer online portal, iOS and Android apps.

SAVE TIME AND MONEY

Information that drives efficiencies and increases productivity for your operation.

REAL TIME "LIVE NOTIFICATIONS"

Inform, create, edit and complete orders for all users within your supply chain.

CUSTOM MADE

Designed to meet the needs of any trucking company. Especially for fuel and any other bulk transported goods.

HEALTH AND SAFETY

Driver check in for compliance with travel alone legislation.

REPORTS

Data analysis, trends, history and so much more.

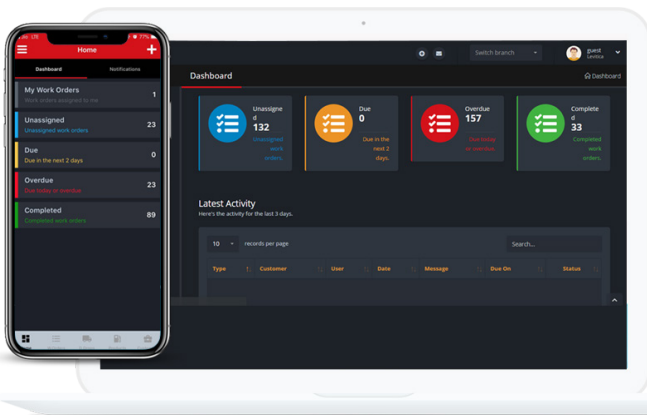

EFFICIENT ORDER MANAGEMENT

Drives efficiencies from order to invoice.

COLLABORATIVE AND INTEGRATED

Simple and easy to integrate with other systems.

Live dispatch is available as a service (saas).

Contact North Star Systems for more information.
